OBJECTIVE

DevOps-focused fresher with hands-on experience building CI/CD pipelines using Jenkins, GitHub Actions, and AWS. Implemented automated deployments, infrastructure provisioning with Terraform, and resolved real-world caching issues using CloudFront.

TECHNICAL SKILLS

- **DevOps & CI/CD:** Jenkins, GitHub Actions, CI/CD Pipelines
- **Cloud:** AWS (EC2, S3, CloudFront, IAM)
- **Infrastructure as Code:** Terraform
- **Containers & Orchestration:** Docker, Kubernetes
- **Monitoring & Observability:** Prometheus, Grafana
- **Programming & Scripting:** Python, Bash, YAML
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux, Windows

PROJECTS

LogGuard – Log Operations System

Tech Stack: Linux, Bash Scripting, AWS EC2, Amazon S3, Cron Jobs, GitHub

- Developed LogGuard, a log management system to automate log archival and cleanup, reducing disk space issues on Linux servers.
- Automated scheduled log rotation using Bash scripts and cron jobs, ensuring system stability and preventing storage overflow.
- Implemented monitoring, alert mechanism for disk usage threshold, improving system reliability.

DevOps-Powered Portfolio Deployment

Tech Stack: AWS(S3, CloudFront), GitHub Actions, Terraform, React

- Designed and deployed a cloud-native static website using AWS S3 and CloudFront, provisioned entirely using Terraform.
- Built a fully automated CI/CD pipeline using GitHub Actions to deploy updates, including CloudFront cache invalidation to resolve state content issues.
- Delivered a globally distributed, low-latency web application with HTTPS and edge caching.

DeploySafe– Production-Grade CI/CD Pipeline

Tech Stack: Git, GitHub, Jenkins, Docker, Kubernetes, AWS (EKS, EC2, IAM), Terraform, Prometheus, Grafana, Trivy, Slack, Linux, Bash, YAML.

- Built an end-to-end CI/CD pipeline using Jenkins, Docker, and Kubernetes for automated application deployment.
- Integrated trivy for container security scanning and implemented automated Docker image tagging.
- Deployed application on Kubernetes with rolling updates, reducing deployment downtime.
- Automated build and deployment workflows, reducing manual effort by ~60%

CERTIFICATIONS

- DevOps & Cloud Computing – PW Skills
- Kubernetes for the Absolute Beginners – KodeKloud
- Linux for Absolute Beginners – KodeKloud

EDUCATION

- B.Sc. Computer Science – Fergusson College, Pune (Aug 2022 – May 2025): **8 CGPA**
- HSC (Jun 2019 – Mar 2021): **9.16 CGPA**
- SSC (Jun 2018 – Mar 2019): **8.55 CGPA**

LANGUAGE

English, Hindi, Marathi
