PURVA WANKHEDE

7796250258 | purvaa462@gmail.com | /in/purvaw01 | Pune, India

OBJECTIVE

Computer Science graduate with hands-on experience in Linux, scripting, CI/CD, Docker, Kubernetes, and AWS. Built production-ready deployment pipelines focused on automation, scalability, and reliability.

TECHNICAL SKILLS

- **DevOps & CI/CD:** Jenkins, GitHub Actions, CI/CD Pipelines
- **Cloud & Infrastructure:** AWS
- **Infrastructure as Code:** Terraform
- **Containers & Orchestration:** Docker, Kubernetes
- **Monitoring & Observability:** Prometheus, Grafana
- **Programming & Scripting:** Python, Bash
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux, Windows

PROJECTS

Automated Backup & Versioning System

Tech Stack: Linux, Bash, Cron, Git, GitHub, GitHub Actions

- Built a Bash-based automated backup system with timestamped versioning and scheduled execution using Cron.
- Implemented CI workflows using GitHub Actions for automated validation, execution logging, and failure tracking.
- Improved backup reliability and traceability by eliminating manual intervention and ensuring consistent version control.

DevOps-Powered Portfolio Deployment

Tech Stack: AWS(S3, CloudFront), GitHub Actions, Terraform, React

- Designed and deployed a cloud-based portfolio using Terraform (Infrastructure as Code) to provision and manage AWS S3 and CloudFront resources.
- Implemented a fully automated CI/CD pipeline using GitHub Actions to build the React app and deploy artifacts to S3 with integrated CloudFront cache invalidation.
- Built a scalable and globally distributed architecture leveraging S3 static hosting and CloudFront CDN, ensuring secure, reliable, and low-latency content delivery.

DeploySafe– Production-Grade CI/CD Pipeline

Tech Stack: Git, GitHub, Jenkins, Docker, Kubernetes, AWS (EKS, EC2, IAM), Terraform, Prometheus, Grafana, Trivy, Slack, Linux, Bash, YAML.

- Designed and implemented an end-to-end CI/CD pipeline using GitHub, Jenkins, Docker, and Kubernetes.
- Integrated container image security scanning (Trivy), automated Docker image tagging, and Kubernetes-based rolling deployments.
- Automated the build-test-deploy workflow, reducing manual effort by approximately 60 to 70% compared to manual docker build and kubectl-based deployments.

EDUCATION

- B.Sc. Computer Science – Fergusson College, Pune (Aug 2022 – May 2025): **8 CGPA**
- HSC (Jun 2019 – Mar 2021): **9.16 CGPA**
- SSC (Jun 2018 – Mar 2019): **8.55 CGP**

LANGUAGE

English, Hindi, Marathi
