PROFESSIONAL SUMMARY

Computer Science graduate with experience designing and implementing production-style **DevOps solutions** focused on **CI/CD**, **cloud infrastructure**, and **deployment automation**. Passionate about building **reliable, scalable, and secure systems** through **Infrastructure as Code (IaC)** and **cloud-native technologies**.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, CloudFront, IAM)
- **DevOps & CI/CD:** Jenkins, GitHub Actions, ArgoCD
- **Infrastructure as Code:** Terraform
- **Configuration Management & Automation:** Ansible
- **Containers & Orchestration:** Docker, Kubernetes, Helm, Argo Rollouts
- **Monitoring & Observability:** Prometheus, Grafana, Alertmanager
- **Programming & Scripting:** Python, Bash, YAML
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux, Windows

PROJECTS

DeploySafe – End-to-End GitOps CI/CD Pipeline

Tech Stack: FastAPI, Python, Docker, Jenkins, Git, GitHub, Terraform, Kubernetes (K3s), Helm, ArgoCD, Argo Rollouts, Prometheus, Grafana, Alertmanager, Trivy, Slack, Linux.

- Built an end-to-end **CI/CD pipeline** using **Jenkins**, **Docker**, **Kubernetes**, and **ArgoCD**, automating **90%+** of the deployment workflow.
- Implemented **Blue-Green deployments**, **Argo Rollouts**, and **automated rollback** using **Prometheus** health checks for **zero-downtime** releases.
- Provisioned Kubernetes infrastructure with **Terraform** and **Helm**, managing **10+ production-style resources** as **Infrastructure as Code (IaC)**.
- Integrated **Prometheus**, **Grafana**, **Alertmanager**, and **Slack** for real-time **monitoring, alerting**, and deployment notifications.

DevOps-Powered Portfolio Deployment

Tech Stack: AWS (S3, CloudFront), GitHub Actions, Terraform, React

- Built a cloud-native static website on **AWS** using **Terraform**, automating infrastructure provisioning with **Infrastructure as Code (IaC)**.
- **Implemented a GitHub Actions CI/CD** pipeline for automated deployments and **CloudFront** cache invalidation.
- Delivered a highly available static website using **Amazon S3**, **Amazon CloudFront**, **HTTPS**, and edge caching for secure, low-latency content delivery.

LogGuard – Log Operations System

Tech Stack: Linux, Bash Scripting, AWS EC2, Amazon S3, Cron Jobs, GitHub

- Developed **LogGuard**, a **Linux log management** solution to automate log archival and cleanup, reducing disk space issues.
- Automated **log rotation** using **Bash scripting** and **Cron Jobs**, preventing storage overflow and improving system stability.
- Implemented **disk utilization monitoring** and **alerting** with **Bash automation**, enhancing server reliability and proactive system maintenance.

CERTIFICATIONS

- DevOps & Cloud Computing – PW Skills
- Kubernetes for the Absolute Beginners – KodeKloud
- Linux for Absolute Beginners – KodeKloud

EDUCATION

- B.Sc. Computer Science – Fergusson College, Pune (Aug 2022 – May 2025): **8 CGPA**

LANGUAGE

English, Hindi, Marathi
