

PURVA WANKHEDE

7796250258 | purvaa462@gmail.com | /in/purvaw01 | Pune, India

OBJECTIVE

Computer Science graduate with hands-on experience in Linux, scripting, CI/CD, Docker, Kubernetes, and AWS. Skilled in building automated, scalable, and reliable deployment pipelines through real-world projects. Passionate about applying DevOps practices to improve efficiency, streamline workflows, and support cloud-based applications.

TECHNICAL SKILLS

- **DevOps & CI/CD:** Jenkins, GitHub Actions, CI/CD Pipelines
- **Cloud:** AWS
- **Infrastructure as Code:** Terraform
- **Containers & Orchestration:** Docker, Kubernetes
- **Monitoring & Observability:** Prometheus, Grafana
- **Programming & Scripting:** Python, Bash
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux, Windows

PROJECTS

LogGuard – Log Operations System

Tech Stack: Linux, Bash Scripting, AWS EC2, Amazon S3, Cron Jobs, GitHub

- Built LogGuard, a DevOps log management system using Linux, Bash, AWS EC2, and Amazon S3..
- Automated log archival and cleanup using Bash scripts and cron jobs to optimize disk usage.
- Implemented monitoring, disk usage validation, and notification-based alerting for log operations.

DevOps-Powered Portfolio Deployment

Tech Stack: AWS(S3, CloudFront), GitHub Actions, Terraform, React

- Designed and deployed a cloud-based portfolio using Terraform to provision and manage AWS infrastructure, including Amazon S3 and Amazon CloudFront.
- Implemented a fully automated CI/CD pipeline using GitHub Actions to build a React application, deploy static assets to S3, and trigger CloudFront cache invalidation for real-time updates.
- Architected a secure and globally distributed static hosting solution using S3 and CloudFront, enabling HTTPS delivery, edge caching, and low-latency content access.

DeploySafe– Production-Grade CI/CD Pipeline

Tech Stack: Git, GitHub, Jenkins, Docker, Kubernetes, AWS (EKS, EC2, IAM), Terraform, Prometheus, Grafana, Trivy, Slack, Linux, Bash, YAML.

- Designed and implemented an end-to-end CI/CD pipeline using GitHub, Jenkins, Docker, and Kubernetes.
- Integrated container image security scanning (Trivy), automated Docker image tagging, and Kubernetes-based rolling deployments.
- Automated the build-test-deploy workflow, reducing manual effort by approximately 60 to 70% compared to manual docker build and kubectl-based deployments.

CERTIFICATIONS

- DevOps & Cloud Computing – PW Skills
- Kubernetes for the Absolute Beginners – KodeKloud
- Linux for Absolute Beginners – KodeKloud

EDUCATION

- B.Sc. Computer Science – Fergusson College, Pune (Aug 2022 – May 2025): **8 CGPA**
- HSC (Jun 2019 – Mar 2021): **9.16 CGPA**
- SSC (Jun 2018 – Mar 2019): **8.55 CGP**

LANGUAGE

English, Hindi, Marathi
